-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 March 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

1. This application contains claims directed to the following patentably distinct

species: 1) The embodiment as shown in figures 1-7;

2) The embodiment as shown in figures 9-14;

3) The embodiment as shown in figures 15-19;

4) The embodiment as shown in figures 20-22.

The species are independent or distinct because they are separate and different structures that cannot be used simultaneously.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

2. During a telephone conversation with Mr. Houser on 10/18/2006 a provisional election was made with traverse to prosecute the invention of group 2, claims 1, 2, 4, 7-

16, 18-26, 28, 29, 36-39, 41 and 42. Affirmation of this election must be made by applicant in replying to this Office action. Claims 3, 5, 6, 17, 27, 30-35 and 40 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1, 2, 4, 7, 11-16, 18-21, 24, 25, 28, 29, 36-38, 41 and 42 are rejected under 35 U.S.C. 102(e) as being anticipated by WO 03/103760. WO discloses a product container 30 with a longitudinal discharge valve and stem 32 and an actuator assembly 52, 55 and 56 with a plurality of arms on 52 which actuator assembly frictionally abuts the interior wall of housing 22 that tapers at 21. In regard to claim 13, portion 40 of the housing moves with respect to the container 5 as claimed.

Art Unit: 3754

6. Claims 19-21, 28 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Ostrowsky (3,760,988). Ostrowsky discloses an actuator cap 24 that varies in cross section from 30 to 46, with a longitudinal discharge valve and stem 22 and an actuator assembly 26 with a plurality of arms 68 that extend beyond a portion of the main wall at 36, 40 but do not extend beyond the greatest lateral extent of the main wall at 30.

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 8-10, 22, 23, 26 and 39 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 03/103760. WO discloses a combination substantially as claimed but does not disclose the specific claimed dimensions. However, one of ordinary skill in the art would have considered the actual dimensions of the container and actuator to be design considerations that are obvious to and well within the scope of knowledge of one of ordinary skill in the art.

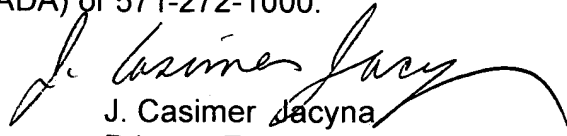

9. Claims 22 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ostrowsky (3,760,988). Ostrowsky discloses a combination substantially as claimed but does not disclose the specific claimed dimensions. However, one of ordinary skill in the art would have considered the actual dimensions of the container and actuator to be design considerations that are obvious to and well within the scope of knowledge of one of ordinary skill in the art.
